

Packaging architecture for three rituals

A proposed production system for the one-stick Travel Sleeve, five-stick Daily Ritual, and twelve-stick Family Reserve. The brand family combines forest-green paperboard, terracotta coding, antique-gold detail, kraft structure, and hygienic primary wraps.

DESIGN + QUOTING BASIS

PHYSICAL SAMPLE REQUIRED

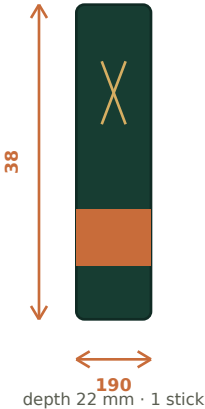

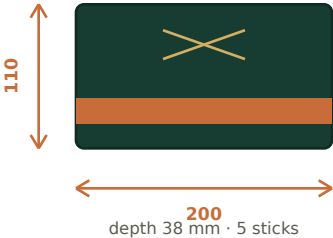

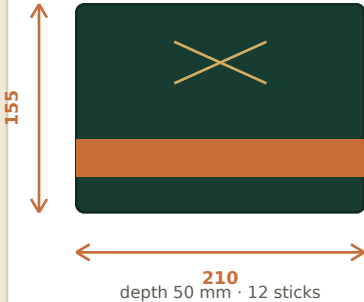

Ancient roots. Modern ritual.

Exploded render shows component relationships; exact measurements follow.

Proposed finished-pack dimensions

Dimensions are length x width x depth. Confirm the product envelope at the 95th percentile, then let the packaging converter add board caliper, machine tolerances, glue flaps, bleed, grain direction, and cut/crease geometry.

One system, three packaging jobs

SR-T01 · 01

Travel Sleeve

190 x 38 x 22 mm

A single 165 mm stick rests in a narrow kraft cradle inside a tamper-evident folding sleeve. Preparation and storage guidance print inside the flap or on a compact folded strip.

PROPOSED CONSTRUCTION

- 350-400 gsm uncoated folding paperboard
- Kraft-fibre retaining cradle
- One food-contact-approved cellulose wrap
- Water-based matte protection if rub testing requires it

SR-R05 · 05

Daily Ritual

200 x 110 x 38 mm

The signature pull-drawer organizes five wrapped sticks in one presentation row. A reusable ventilated tube and folded care guide use a dedicated side or lower channel.

PROPOSED CONSTRUCTION

- 400 gsm outer sleeve; 500-600 gsm kraft drawer
- Five sealed cellulose primary wraps
- Vented tube: 180 mm long x 24 mm outside diameter
- Folded ritual guide: 85 x 75 mm finished

SR-F12 · 12

Family Reserve

210 x 155 x 50 mm

Twelve wrapped sticks sit in two indexed rows of six. A larger folding carton, removable fibre tray, and recloseable band support household storage and stock rotation.

PROPOSED CONSTRUCTION

- 400-450 gsm uncoated paperboard carton
- Moulded-fibre or folded-kraft two-row tray
- Twelve sealed cellulose primary wraps
- Care guide: 180 x 120 mm before folding

What must be approved before mass production

The measurements in this brief support early supplier quoting and prototype development. They are not final dielines and do not replace packaging engineering, food-contact review, product testing, or market-specific label review.

01 · PRODUCT ENVELOPE

- Condition representative sticks and record length and diameter distribution.
- Use the 95th-percentile pack-out sample to confirm internal clearances.
- Target stick: 165 mm long x 10-14 mm diameter; natural tolerance remains expected.

02 · MATERIAL + BARRIER

- Validate every primary wrap for food-contact suitability and seal integrity.
- Set moisture and oxygen barrier only after microbial and shelf-life testing.
- Verify board caliper, rub resistance, odor transfer, migration, and transit performance.

03 · LABEL CONTENT

- Botanical name, plant part, country of origin, lot, pack date, best-before date, and storage.
- Preparation, use, air-drying, replacement, supervision, irritation warning, and professional-care statement.
- Responsible business details, net count, barcode, and validated disposal instructions.

04 · GOLDEN SAMPLE

- Approve a converter white sample before artwork lock.
- Run fit, drop, vibration, compression, seal, microbial, moisture, and accelerated shelf-life tests.
- Sign a fully packed printed golden sample before mass production.

Approval note

Confirm certification, sustainability, recycling, origin, and oral-care claims before printing. Decorative linework must be original and must not copy sacred, restricted, or community-owned symbols.
